Even as an older edition, this is still useful information!By SmokePThis is only the second volume but it is on its fifth printing now and each new printing adds new material and information. The older volumes are still highly useful for the general sportsman and collector.0 of 0 people found the following review helpful. Ammo Encyclopedia ReviewBy RobertThe book covers in nice detail, many of the items in my collection, however there are a number of obsolete cartridges that are not covered that i have and would like to have more information on. Computer images do not do justice in the front sections of he book, and actual size photos would be an advantage in future editions. The measurements given are excellent for identification of suspect cartridges, and overall, I am happy with my purchase, but it could have been better.0 of 0 people found the following review helpful. Five StarsBy Thomas L. ThompsonEven better than first.

Over 800 pages containing ammunition information on rimfire, centerfire, and shotshell cartridges, including history and development, illustrations and facts! A great source for hunters, shooters, and reloaders!

About the Author Michael "Mike" Bussard has been a familiar face in the firearms and ammunition industries for over 40 years. His areas of expertise include firearms and ammunition design, research and development, ballistics, marketing, sales, advertising, promotion, and consulting. During his career, he has been employed by such well-known companies as: Federal (twice), Norma, Israel Military Industries, FIOCCHI, RUAG, Sierra Bullets, SIG, Barrett, and Sturm Ruger. Mike has also served as a technical consultant to many ammunition manufacturers, including PPU, Swartklip, Brenneke, Precision Ammunition, Olympic Ammunition, Mossberg, HK, and Steyr. Mike has designed five new cartridges, numerous individual loads, and several complete product lines (such as Federal's Premium line), in addition to three handguns and two rifles. During his career, Mike has also worked with government agencies such as the U.S. Army Advanced Marksmanship Training Unit, Navy Shooting Team, Marine Corps Shooting Team, U.S. Secret Service, Federal Bureau of Investigation, Border Patrol, U.S. Army Material Command, California Highway Patrol, Illinois State Police, and many other law enforcement agencies, in addition to assisting the U.S. Olympic Shooting Team. For over 10 years, Mike worked on the technical staff of the American Rifleman magazine, and became the Technical Editor. He is the author of numerous magazine articles, manuals, and two books, including The NRA Firearms Sourcebook. He also edited the 7th Edition of Cartridges of the World.
