Great BookBy Customergreat book, I loved it and am thrilled to own it. great seller I recommend dealing with them and look forward to buying from them in the future.19 of 20 people found the following review helpful. photos of 155 pieces + a how-toBy R.The vast majority (about 85%) of this book is the 155 colored plates and catalog, some with enough detail to see individual stitches. The catalog information includes the dimensions of the piece, materials used, and stitching technique. Pieces range from the 16th-19th centuries.There are only 8 pages of background info on culture and history. If you want more on that, see Flowers of Silk and Gold by Krody.If you'd like to try your hand at one of these styles, the last section of the book describes the various techniques and gives directions and clear, easy to follow diagrams.7 of 8 people found the following review helpful. Ottoman Embroidery Awesomeness!By SnowfireI love the details and information in this book. It was one of those books I wanted forever and I was thrilled to get it as a gift! There is history and practical, usable info in here, and some pretty pictures too.

A sumptuous addition to the Victoria and Albert Museum textile series, Ottoman Embroidery showcases in full color 150 stunning pieces from the museum's extensive collection. Dating from the mid-16th to the early 20th century, such common household items as napkins, towels, kerchiefs, and trousers have become exotic with age, and their ornate patterns are sure to inspire contemporary needleworkers. Twelve specially commissioned diagrams illustrate intricate techniques like the double-sided stitch--a 500-year-old style of embroidery still practiced today by a few skilled artisans. To put the collection in context, an introductory text outlines the history of the Ottomans and their impact on European civilization. This image resource offers valuable information for fashion and interior designers.

From Library Journal Beautiful embroidery is one of the unique contributions the Ottoman Empire made to world art. London's Victoria Albert Museum has acquired over 680 pieces of this work. Here, Ellis (Embroideries and Samplers from Islamic Egypt), research assistant at the Ashmolean Museum in Oxford, and Wearden (Samplers from the Victoria Albert Museum and Persian Printed Cottons), assistant curator in textiles and dress at the Victoria Albert Museum, pull selected pieces from that collection for this catalog. The Ottoman Empire is very briefly introduced in a chapter covering its history, expansion, culture, and influence, and tucked behind the plates is a wonderful chapter on the actual embroidery techniques, detailed in text and diagrams. The overall organization of the book is, unfortunately, clunky for example, there is no index, and the illustrations and their captions are separated. However, the color illustrations themselves are large and bright, showing the effect of the embroidery pattern or close-up details of the tiny stitches. An additional purchase for specialized collections. Karen Ellis, Nicholson Memorial Lib. Syst., Garland, TX Copyright 2002 Cahners Business Information, Inc.
