## **Radios: Furniture That Talks**

**Philip Collins : Radios: Furniture That Talks** before purchasing it in order to gage whether or not it would be worth my time, and all praised Radios: Furniture That Talks:

The wooden radios of yesteryear, now highly collectible for their nostalgic and aesthetic values, are the focus of Philip Collins' third volume of beautiful photographic imagery dedicated to the design of radio receivers. Full-color images of over 100 of the radio sets manufactured in the USA present a nostalgic flight of photo fantasy, complimented by period advertisements, ephemera, and illustrations of ancillary radio accouterments. 100 color photos.
