Not only did it have an ad on an early toy gun he owned, but he found out his "clicker" guns were from 1953 instead of from the 1960's. He buys and collects space memorabilia and toys. This book is a great addition to his collection and he wants me to get him another one... one to read and one to put away. As always, it was packaged great and arrived in a very timely manner. I love the service I get from .com and from all their vendors.1 of 1 people found the following review helpful. Enjoyable readBy Sam FreijGood read and is filled with images of old ray gun toys.
