[Ebook free] The Pipe Book

The Pipe Book

Alfred Dunhill : The Pipe Book before purchasing it in order to gage whether or not it would be worth my time, and all praised The Pipe Book:

2 of 2 people found the following review helpful. For the pipe specialist.By Locksley - lover of truthThis is a look at various kinds of pipes, some extremely rare and arcane. Dunhill's approach is eclectic and diverse. Don't expect a "how to smoke a pipe" kind of book.2 of 2 people found the following review helpful. Nice Guide to Pipe SmokingBy TomPFNice book that covers history of pipes, different shapes and styles, and how-to's. Bought mine used through , and it was in nearly mint condition.11 of 12 people found the following review helpful. It Is What It Is, Isn't It!By Tomas DeMossby TOMAS DeMOSS (Not wife Glenda!!) This is an excellent book that will be of major interest to

pipe smokers especially, who enjoy smoking, collecting and reading about pipes and tobacco. The book is EXACTLY what it claims to be. I would have been sorely disappointed if it weren't. Several of the reviewers have denigrated the book because the contents didn't meet their expectations. That is not the responsibility of the book. It's the responsibility of the person who purchased the book to know what the contents are. It always amazes me when people bring home a book and are disappointed with it if it isn't magically filled with the information they were seeking.

As a successful London tobacconist in the early 1900s, Alfred Dunhill's passion for his field led him to begin collecting pipes from all over the world. From his collection he created *The Pipe Book*, which was first printed in 1924 and has rarely been out of print since. The book is a thorough exploration of every type of pipe: primitive mounds and earthen pipes; more elegant models of ivory, clay, and porcelain; and of course modern briars, cobs, and meerschaums with in-depth explanations of their uses, structures, and origins, as well as fascinating anthropological discussions on smoking in various cultures.

"You do not need to be a smoker of pipes, or of tobacco in any form, to enjoy this--book. If you like to be entertained and instructed by unique information, you will find it a fascinating volume--."--New York Times

From the Inside Flap: In 1907, in London, Alfred Dunhill, a young man in his early 30s, opened his first tobacconist's shop. It was an instant success, custom blending individual tobaccos as well as carrying smokers' accoutrements. Dunhill began to develop a collection of pipes from around the world, which was then catalogued. From this emerged, in 1924, *THE PIPE BOOK*, which has rarely been out of print since that date. With black and white photographs as well as line drawings of the vast variety available up to that time, this is a remarkable reference work. Included are: Primitive makeshift, mound, and earthen pipes; Modern briars, cobs, and meerschaums; Water pipes, Far Eastern, Indian, and African pipes; Pipe mysteries, histories, and rituals. As entertaining as it is informative, *THE PIPE BOOK* is a unique treasure.

From the Back Cover: Here is a thorough exploration of every type of pipe, with in-depth explanations of their origins, structures, and uses, as well as fascinating anthropological discussions that span the entire world and hundreds of years. Included is everything from primitive makeshift, mound, and earthen pipes through models of ivory, clay, and porcelain to the modern briars, cobs, and meerschaums, with analyses of the significance of smoking in different cultures. *The Pipe Book* offers the most exhaustive coverage of the history and variety of pipe smoking in print, written with the authority of a name known to every pipe smoker. It is the perfect gift for any pipe smoker or collectors. (5 1/2 x 8 1/2, 280 pages, bw photos, illustrations)

Alfred Dunhill died in 1959. His grandson, Richard Dunhill, is the chairman of Alfred Dunhill Limited.
