**Richard Binder : The RichardsPens Guide to Fountain Pens, Volume 2: Restoration** before purchasing it in order to gage whether or not it would be worth my time, and all praised The RichardsPens Guide to Fountain Pens, Volume 2: Restoration:

He is a legend in the fountain pen community. His site is constantly consulted by professionals, collectors, and wannabe repair folk. I fall into the latter camp, just someone that loves vintage Waterman fountain Pens, and wanted to be capable of replacing ink sacs and doing maintenance work on my own pens, in a competent way.The book is well organized, concise and clear. You can approach it as a reference for just the pen you want to fix, or as a course in pen repair for the motivated adult learner.

Mr Binder covers not just the repair of a given model, but some of its history as well. And he presents this information in a friendly and accessible way. Yes, Mr Binder has opinions about certain pens and certain inks. (Don't we all?) I respect his opinions and judgements for what they are: advice from a nibmeister with decades of experience. 2 of 2 people found the following review helpful. Mr. Binders book is very helpful. Another Fountain Pen Repair Guide HomeRun by Richard Binder! By Michael Smukula This is an incredibly well thought out put together Fountain Pen repair guide for specific fountain pens! Richard, once again put's a 1+2=3 guide for repairing fountain pens! In my opinion, even for someone who is not that well versed in repairing fountain pens, as long as you are a DIY repair person, this book will get you from point A to point Z and cover ALL the bases inbetween! I continue to use this book as a reference guide for those specific fountain pens that are found inside it.....THANK YOU, Richard!

This book is an adjunct to the two excellent existing repair manuals, Marshall/Oldfield and Da Book. It contains material that is often very specific to a particular pen or type of pen, but much of its information can also be applied generally to other pens. Learn what is here, extrapolate from it, and apply your new knowledge to the needs of the pen in your hands at any given moment.
