When mine arrived, it had been opened before, the box was ripped on one side and seal was ripped on the other. There was no stand as the picture shows and the gold rim had rubbed off in spots. It also had a big bar code sticker on half of the box that was added which ruins the box if you plan to display it in there. It's just really cheap.16

READ THIS PRODUCT DESCRIPTION CAREFULLYBy Lisa Roth WalterYes, I should have read the product description and checked on the size, but it would have been better if the product name said "Miniature Plate" vs. "Plate." I guess I will give it to my daughter to use with her American Girl doll. Only buy this product if you are aware of how small it is, and that is what you want.0 of 0 people found the
