The Webley Service Revolver (Weapon)

Robert Maze : The Webley Service Revolver (Weapon) before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Webley Service Revolver (Weapon):

0 of 0 people found the following review helpful. and its varied and world-wide history post-war deserves better. By Norbert Informative and comprehensive on the early history of the Webley revolvers, but the book gets vague, disjointed, and rambling when it comes to the .38 Webley of WW II and after. This is a pity, as the .38 Mark IV is much more widely available especially to the beginning Webley collector and shooter, and its varied and world-wide history post-war deserves better. 2 of 2 people found the following review helpful. A Great Book About IMHO The Greatest Big Bore Revolver In WW I WWI By Kurt G. Zeigler Thank You Robert for a Great book on my Favorite Revolver, easy to Load and fire and Unload the Book is a Very Nice Read spending time on the History Of Webley and the Times. Just wish it had more pages and was a hard cover and While The Author goes into the dreaded History

of the post WWII influx of the shaving of the cylinder to accept .45 CAP ammo and is to this very day many a shaved Webley is blowing the cylinder walls out. (I am a Former Revolver Gunsmith) and I Love Webleys. and Have many of them . in all a Super Great Arms Book. if it seems like I have a soft spot in my Heart for Webleys I do as the M.K.VI I own was my Father's Farther who was a Royal Army Officer in the 18th Hussars. the same Revolver my own Father took to India in 1944-1946 when he was a Spitfire Squadron Leader. 0 of 0 people found the following review helpful. DisappointedBy MarshmanA disappointment...more history of the era versus the revolver itself.

The Webley .455in service revolver is among the most powerful top-break revolvers ever produced and has a claim to be the first 'tactical fighting pistol'. First adopted in 1887, in various marques it was the standard-issue service pistol for British and Commonwealth armed forces for nearly fifty years; later versions in .38in calibre went on to see further service in World War II and beyond, as well as in a host of law-enforcement roles around the world into the 1970s. Developed to give British service personnel the ability to incapacitate their opponents in 'small wars' around the globe, the Webley used the formidable - and controversial - .455in cartridge, a variant of which was known as the 'manstopper'. Users found it offered good penetration and excellent stopping power with only mild recoil - indeed, it was rated superior to the US .45 Colt in stopping power. Featuring specially commissioned full-colour artwork and close-up photographs, this is the compelling story of the Webley revolver, the powerful pistol that saw service across the British Empire and throughout two world wars.

Author Robert Maze tells us the sometimes convoluted story of the Webley Service Revolver from its inception to today's use. This includes all of the different variations and improvements made to the gun over its life time and has additional information on its use by the Irish Constabulary and the Shanghai Municipal Police. It all makes for another superb book and if you are interested in weapons, then this book is very much a must have. Highly recommended. Scott Van Aken, Modeling Madness...this book provides a fine history that incorporates basic firearms design and the evolution of pistol use. A special pick for military or firearms collectors alike. The Midwest Book (November 2012) About the Author Dr Robert Maze, a lifelong collector of 19th- and 20th-century British weaponry, has trained with US SWAT teams and has diplomas from defensive handgun courses. He is the author of Howdah to High Power: A Century of British Breechloading Service Pistols (1867-1967). He lives in Virginia and is vice president of a leading aquaculture company. This is his first book for Osprey.
