LobdillThis and a companion book, "Cowboys", are full of photos taken in 1903 on a large ranch at Hugo, CO. founded by Wm. T. Holt. The pictures involved three ranches, The Holt, the Field, and the Barker. The ranch land at that time still had large areas of open range, and the cattlemen still held roundups. The pictures were all taken within a short span of time by a professional photographer, Frank Sherman, whose brothers worked on this ranch as cowboys. One of them was the foreman. Frank had a photography studio in Colorado Springs. The pictures depict a real roundup.The photographer took over 300 pictures on 5x7 glass negatives. During the days of Frank's project President Teddy Roosevelt came through Hugo on a train. The cowboys set up the chuck wagon at the station, and fed Roosevelt breakfast. There are pictures of this event in "Cowboys".But for sheer luck these photos would have ended up in the city dump at Lebanon, Oregon. The house that Frank lived in in later life was being sold in 1966 by the then owner. She called John Eggen, a local photographer, and asked if he wanted some old boxes of glass negatives. He went out and got them. They are a treasure trove for anyone interested in the way old time cowboys really lived.Buy both of these books. I did.0 of 0 people found the following review helpful. Great old photosBy Ron DonnellyGreat old photos, if you love the old west and really want to see what they wore, this book is for you1 of 1 people found the following review helpful. Evocative Images of the Old West!By Mike O'ConnorJohn Eggen's THE WEST THAT WAS is a fascinating 'time travel' look back at Wild West cowboys. Taken by frontier photographer Frank Sherman, the images found in this Schiffer release depict life as experienced by working cowboys in Colorado circa the late 1800s/early 1900s.The scenes found in THE WEST THAT WAS capture the life and times of cowboys working for the Holt Cattle Company. Hundreds of photographs show cowboys rounding up steers, branding 'em, training horses, camped out on a cattle drive, asleep under the stars, chowing down, etc. Taken together, they show us a rare, definitely non-Hollywood glimpse of how life really was for those hardworking cowpokes 'way back when.'Fans of the old West will enjoy THE WEST THAT WAS. It's pure history captured as it was happening. Recommended.

Much of early Americana has been destroyed and lost forever. But occasionally, and almost miraculously, some parts of its survive. So it is with the photographs in this book. Saved from an ignominious end in the city dump, they chronicle and enliven the cowboy's life on the range. The result is a beautiful volume of real-life images of western cattlemen. These unretouched photographs taken from the original 5" x 7" negatives give an unprecedented look at life on the ranch and trail. We are presented with real people seen on the job. We see the costumes, the work, the everyday necessities of the range. And as the cowboys stare back at the camera or work with one another, the reader will get the sense of knowing them and their way of living. This is an important volume of history that every student of the Old West will cherish.

About the Author John Eggen grew up on a homestead in South Dakota. At the time there was still open range and he had the experience of riding herd when he was a child. He studied photography with Ansel Adams, and operated a photography studio in Lebanon, Oregon for 32 years.
