(Online library) Thunderbolts of the U.S. 8th Army Air Force: March 1944 - May 1945 (Air Battles)

## **Thunderbolts of the U.S. 8th Army Air Force: March 1944 - May 1945 (Air Battles)**

**Tomasz Szlagor : Thunderbolts of the U.S. 8th Army Air Force: March 1944 - May 1945 (Air Battles)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Thunderbolts of the U.S. 8th Army Air Force: March 1944 - May 1945 (Air Battles):

The P-47 Thunderbolt, also known as the "Jug", was the largest, heaviest, and most expensive fighter aircraft in history to be powered by a single reciprocating engine. It was one of the main United States Army Air Forces fighters of World War II, and served with other Allied air forces. The P-47 was very effective in air combat but proved especially adept at ground attack. Richly illustrated with contemporary photographs and color profiles as well as maps, Thunderbolts Of The U.S. 8th Army Air Force describes the use of P-47 Thunderbolt fighters in many air operations over Europe between March 1944 and May 1945. About the Series Air Battles is a series of books focusing on World War II air battles of specific aircraft and units. Each volume contains information on the planes involved, lists of scores, pilot reports and portraits, color profile artwork and maps.
