11 people found the following review helpful. Toy Buildings 1880-1980By R. KepnerAn outstanding book for dollhouse collectors. Toy Buildings is a must for any collector with interest from Bliss to Converse to Keystone buildings. This book is not limited to dollhouse, but covers a wide variety of toy buildings, many that my brother had.

It is an excellent refernce for history of manufactures to present day values for many toy buildings of this era. The color photos are of high quality and does an outstanding job of detailing many old toy building. Most dollhouse collectors have accumulated many Mystery buildings, this book is very useful in unraveling these Mysteries. Written by two excellent collectors, who have written several dollhouse books, this book offers new photos and information on

houses and buildings not discussed in past publications. I am a collector of over 25 years and am very glad that I have added this outstanding book to my library. 1 of 1 people found the following review helpful. Five Stars  
By Connie S. Campbell  
A fascinating, well-organized book for the collector!

A history of architecture, in miniature, is seen here through a century of children's toys. For years, toy buildings have inspired the imaginations of both children and adults. Valued as collectible items and praised for architectural design, toy buildings provide hours of fun as well as educational insight into the times in which they were made. This book includes over 550 photographs of toy villages, dollhouses, barns, stables, schools, fire stations, stores, theaters, airports, railroad depots, garages, service stations, castles, forts, and other structures. Photographs from catalogs and magazines verify dates of production and manufacturers including Marx, Schoenhut, Bliss, Gottschalk, Plasticville, Keystone, Rich, Arcade, Built-Rite, Converse, Chein, Ohio Art, Renwal, and Tri-ang. Estimated prices are provided in the captions and sources for finding toy buildings are listed. This book will be an indispensable tool for collectors of toy vehicles, model railroads, playsets, dollhouses, gas station memorabilia, and toy soldiers.

About the Author  
Patty Cooper and Dian Zillner are also co-authors of *Antique Collectible Dollhouses and Their Furnishings*. They are inveterate researchers who enjoy sharing information about their favorite subjects with others.
